

ALEX RIVERA

SENIOR CLOUD & DEVOPS ENGINEER

Location: San Francisco, CA Email: alex.rivera@cloudtech.dev Phone: +1 (555) 019-2834
LinkedIn: linkedin.com/in/arivera-cloud GitHub: github.com/arivera-dev

TECHNICAL SKILLS

Cloud Platforms

AWS Azure GCP

Infrastructure as Code

Terraform CloudFormation Ansible

Pulumi

Containers & K8s

Docker Kubernetes EKS AKS

Helm ArgoCD

CI/CD & Automation

GitHub Actions Jenkins GitLab CI

Python Bash

Monitoring & Security

Prometheus Grafana Datadog

CloudWatch IAM Vault

Networking & Storage

VPC / VNETs Route53 PostgreSQL

DynamoDB Redis

CERTIFICATIONS

AWS Solutions Architect - Pro

Amazon Web Services | 2024

Certified Kubernetes Admin (CKA)

Linux Foundation / CNCF | 2023

HashiCorp Terraform Associate

HashiCorp | 2023

AWS DevOps Engineer - Pro

Amazon Web Services | 2022

EDUCATION

B.S. in Computer Science

San Jose State University

2014 – 2018 | GPA: 3.8/4.0

PROFESSIONAL SUMMARY

Results-driven Senior Cloud & DevOps Engineer with over 6 years of experience designing, automating, and securing high-availability multi-cloud environments (AWS & Azure). Specialized in Infrastructure as Code (IaC) using Terraform, container orchestration with Kubernetes (EKS/AKS), and high-throughput CI/CD pipelines. Demonstrated track record of optimizing cloud costs by over \$140K annually while maintaining 99.99% system uptime.

WORK EXPERIENCE

Lead Cloud Engineer

Austin, TX | 2023 – Present

CloudScale Technologies Inc.

- Architected and deployed multi-region resilient AWS infrastructure supporting 2M+ active daily users using Terraform and Kubernetes (EKS), achieving 99.99% service availability.
- Built zero-downtime GitOps continuous delivery pipelines utilizing GitHub Actions, Helm, and ArgoCD, accelerating production release frequency from bi-weekly to daily.
- Implemented FinOps cloud cost optimization strategies across enterprise accounts, reducing annual cloud expenditure by \$140,000 (35% reduction).
- Enforced strict zero-trust security standards by automating AWS IAM least-privilege roles, HashiCorp Vault secrets management, and container image scanning with Trivy.

Senior Cloud & DevOps Engineer

Seattle, WA | 2021 – 2023

Apex Enterprise Systems

- Spearheaded legacy monolith migration to containerized microservices hosted on Azure Kubernetes Service (AKS), cutting hosting footprint and improving response times by 30%.
- Engineered reusable, modular Terraform templates for VPC networking, load balancers, and managed databases (RDS/PostgreSQL) across 12 product engineering teams.
- Standardized end-to-end monitoring and alerting infrastructure using Prometheus, Grafana, and Datadog, decreasing Mean Time to Resolution (MTTR) by 45%.
- Configured secure hybrid cloud connectivity featuring IPsec VPNs, DirectConnect, and strict network security groups across multi-tenant environments.

Cloud Infrastructure Analyst

San Jose, CA | 2018 – 2021

DataPulse Corp

- Managed automated deployment and configuration of 200+ AWS EC2 instances and serverless Lambda microservices using Ansible and Python scripts.
- Developed automated cloud disaster recovery and failover backup solutions on S3 and Glacier, lowering target Recovery Time Objective (RTO) to under 15 minutes.
- Supported database migrations from on-premises SQL Server instances to Amazon RDS PostgreSQL with minimal application downtime.

KEY PROJECTS & ACHIEVEMENTS

- **Enterprise Multi-Cloud Landing Zone:** Designed standardized IaC landing zones in AWS/Azure featuring automated network peering, central logging (ELK), and guardrails via AWS Control Tower.
- **Automated Disaster Recovery Framework:** Built cross-region automated backup and failover runner using AWS Lambda & Python, saving ~120 engineer hours annually.
