

Rohan Mehta

CLOUD INFRASTRUCTURE & DEVOPS ENGINEER

Loc: Bengaluru, India | Email: rohan.m@cloudtech.io | Phone: +91 91234 56789 | LinkedIn: linkedin.com/in/rohanmehta-cloud

TECHNICAL SKILLS

Cloud Platforms

AWS Microsoft Azure

IaC & Automation

Terraform CloudFormation Ansible

Containers & K8s

Docker Kubernetes AWS EKS Helm

CI/CD & Monitoring

GitHub Actions Jenkins Prometheus

Grafana

Scripting & DBs

Python Bash PostgreSQL DynamoDB

CERTIFICATIONS

AWS Solutions Architect Assoc.

AWS | 2024

Certified Kubernetes Admin (CKA)

CNCF | 2023

EDUCATION

B.E. in Computer Science

VTU Karnataka

2018 – 2022

PROFESSIONAL SUMMARY

Experienced Cloud & DevOps Engineer with 4 years of expertise in containerizing applications, orchestrating Kubernetes (EKS) clusters, and building automated CI/CD pipelines. Specialized in cost optimization, infrastructure automation with Terraform, and ensuring high service availability.

WORK EXPERIENCE

Cloud DevOps Engineer

2023 – Present

Vanguard Software Systems

- Designed and maintained AWS infrastructure using Terraform, cutting manual setup time by 80%.
- Managed multi-node Kubernetes (EKS) clusters supporting microservices with 99.95% uptime.
- Built zero-downtime deployment pipelines using GitHub Actions and Helm for production software.
- Implemented AWS FinOps strategies, saving \$45,000 annually in unutilized compute costs.

Associate Infrastructure Engineer

2022 – 2023

DataPulse Global

- Automated server provisioning and software configuration across 100+ Linux instances using Ansible.
- Set up centralized logging and monitoring using Prometheus and Grafana for real-time alerting.
- Supported database migrations from on-premise PostgreSQL to AWS RDS instances with zero data loss.
